What's involved in situations we label as "becoming aware of" what kinds of actions/words/etc. precede people saying thing like, "I became aware that. . ."

A process

1. unaware/untroubled
2. aware/troubled
3. aware/untroubled

Step #2 requires an ability to formulate an image/concept/etc of "how it could be" and to formulate an image/etc of "how it is (should be)", and to distinguish between the two.

Only entities with "cultural" languaging could attempt #2 and/or #3

They entire program beyond step #1 occurs in the domain of language.

How does one "know" that he is troubled?
If one "thinks" he is troubled, is he?
Is it possible for one to feel untroubled;
and yet actually be deeply troubled?

Universe is like a huge puzzle.

One reason for humans/consciousness/etc. is to figure it out-

Who'd a thought we'd discover our own bio-ancestory in a dusty/rocky gorge in Africa.

As Universe Evolves we get closer to the beginning

We see farther back.

We know more about Bach now than people did 200 years ago.

More "subtle" aspects of Universe open before us.

"Science" is the Name of my Religion

You don't need a cyclotron to do leading edge science these days - Only if you're doing nuclear physics -

Linguistics

Sociology

General Systems Theory

What are you interested in

(probably nothing or "I don't know.")

The most important thing we've learned this century is how amazingly little we really know. We don't even known what we mean in using the word "know".

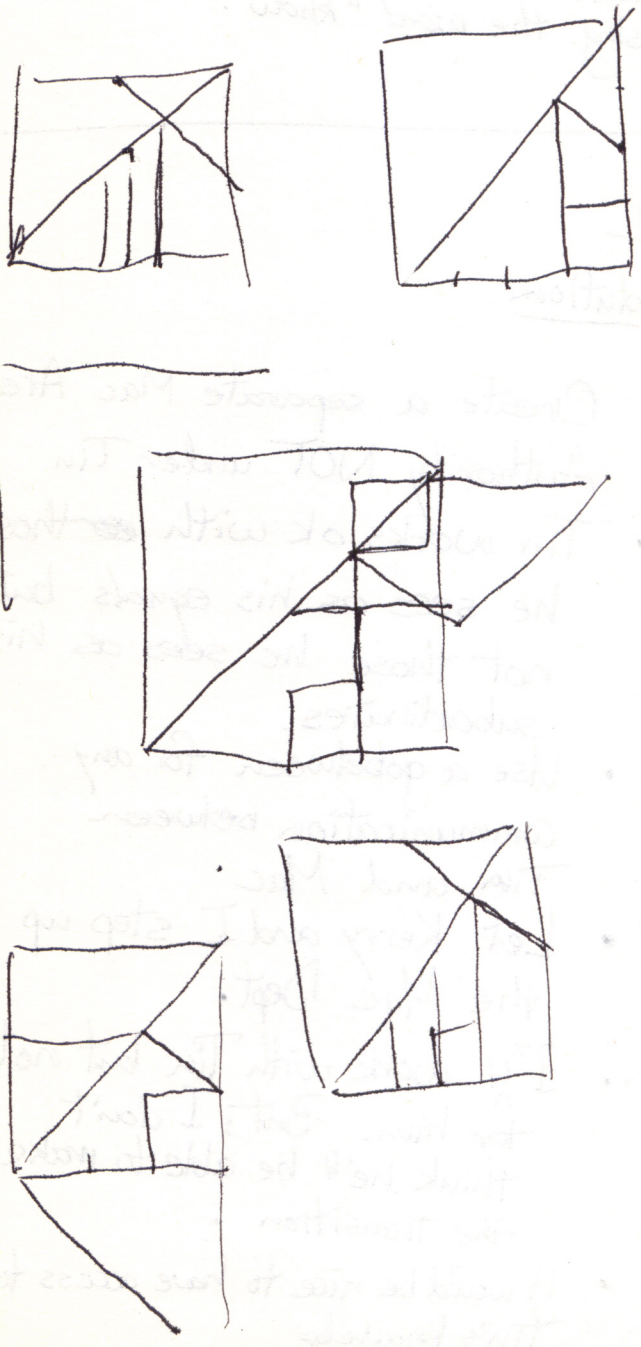
Solution

- Create a separate Mac Area of Authority NOT under Tin
- Tin works ok with those he sees as his equals but not those he sees as his subordinates.
  - Use a gobetween for any communication between Tin and Mac
  - Let Kerry and I step up the Mac Dept.
  - I'll work with Tin but not for him. But, I don't think he'll be able to make the transition.
  - It would be nice to have access to Tin's knowledge

5090



Thurs June 4
6.9/2.165

ERIC

- I'm still upset/dissappointed/etc.
- I liked the people, the work, the hours — Only one problem!
- Tin's problem's are:
  - linguistic
  - cultural
  - personal

  Best position: Asst. to Sup.
- I could work with him - not for him!
- Possibilities
  1. [redacted] put Jackie in charge.
  2. Separate Mac — have buffer
- Question — how committed are you to Mac and a computerized future?
- New software on the way
- Access to Tin's knowledge
  But he can't train.
  His knowledge is lost to you.

A purpose of the Journal
is to become conscious —
— not necessarily[1] to get things done.

It's not a sin to be concerned with being conscious. It's important to be where you're at.

~~Anger~~

Much of my anger arose from my ~~resentment~~ realization of the needless hours spent in mere survival behavior the necessity of which was held in place not by "reality" - but by some idea of reality / or economic system / political system etc.
At the time and for many years thereafter I was unable to articulate this resentment.
∴ it remained unconscious and active.

Don't confuse "how it has been" with "how it could be"

Most people have bought into the dd, primitive, "safe", deterministic model of "reality".

It's an easy view. You don't have to get involved. You don't have work toward fulfilling your vision. You don't even have to have a vision. In fact, "vision" ~~could~~ can untidy your life. Vision can ~~give~~ create "meaning".

Our "job"/duty/privelege/etc. is to "realize" our vision/dream/goal/whatever.

the truth is - that's what we do anyway. But usually we aren't "responsible" for our vision - we inherit one by default unless we actively engaged in the are conscious process of creating/discovering our vision of Paradise

  words : interpretations
- Even most of our religions are most human constructs; the Sun and Moon are not human invention. Deciding to put life in harmony/contact with a larger Domain IS a human act.

- You become "empowered" by putting your life/body in accord with the larger Universe. It can take anywhere from 6 mo to years (depending on a number of variables [intelligence/previous experience/etc]) to feel the power surging thru your body/mind/etc.

Infected with
Earth meme.
the growing recognition
of Earth as a single living
system in which ~~we live~~
we participate . . .

5346

25.24/2.357
Sun Dec 13

I'm a carrier of the meme -
"Earth is a single living entity..."
Identity resides <u>in</u> Earth as much
as <u>in</u> any of it's subsysems.

EARTHmeme

the job of an Agent of Evolution is
to infect as many hosts as possible.

Observation

A Rant

- Dominant life form of universe is spherical.
- Earth is a single living entity.
  - Humans are subsystems of Earth.
- Identity resides as much in EARTH as in any of its subsystems

One correct analysis of some phenomenon doesn't invalidate another different but also correct analysis of similar phenomenon.

- An Agent's job is to infect as many potential host's as possible with the Earthmeme
- When a person realized the truth of this analysis in living/choosing/etc acting the quality of 'ordinary' life is transformed.
- When enough people wake up, Earth will emerge.
- You make the difference.

OVERY

5348 RANT (cont.)

- Pass this card on.
  Infect someone you love.
- Thinking/Analyzing/Classifying/etc.
  - Oneself as a body is not an incorrect analysis. It is one possible correct - partial analysis.

ABZ

The spread of ideas may be analyzed in terms similar to the spread of germs.
Basic units of idea are "memes."
Memes are patterns of information embodied in spoken/written/etc. LANGUAGE. and spread by these agents.

Rule #1
In order to use a "generalization" word
one should be able to give at least
three (3) concrete, weighable,
observable example of its specific
realizable

eg

A) "People are unconscious 95%!"

B) "I challenge you to cite 3 examples."

A) "you, me, and your wife" (husband) (kid) (parent) (lover) (best friend)

3426

Rules #1 I never use my journal on moondays - unless it's absolutely necessary because of some tragedy, or something really important.

Rules #2 I never use my journal on moondays - unless I ~~[illegible]~~ feel like it.

the difference between these rules is felt to be the origin/source of the rule's "power" (say "inside" or "outside" "Self". Rules 2 seems like no rule at all.

- Reading Rockwell Milestone Roughs is a good example of what a person (bio-machine) can do that a ~~comp~~ (silicon-machine) computer can't presently do. Only a person could decipher such a mess.

But then - only a person could create such a mess!

Inner intellectual process is and probably must/should be messy. That works within yourself. When, however, you ~~want~~ want to ~~share~~ communicate "without" your self - more order is useful.

A goal of CAE is to develop a technology for articulating questions in ways that lead to their speedy resolution.
by one of 3 avenues:

1. it's answered
2. it's determined to be answerable and a preliminary path is outlined.
3. It evaporates into nonsense.

Process

- Write a preliminary draft of question.
- Edit it.
  - the
  - fake nouns
  - fake verbs
  - absolutes
  - pronouns, (I)

In the process of formulating / articulating the question, one of 3 things will occur:

1. You'll answer it.
2. You'll see a way to answer it.
3. You'll realize it's a stupid question.

One of the first signs of (evolving/growing/etc.) (awareness/consciousness/etc.) is an awareness of how unaware oneself and others really are. This feels like a step backward. It feels bad. But if you look at it clearly it is an opening to a new level of conscious living. Its an enormous break-through. Of course your head hearts - after battering through a wall.

- And what factors determine who shows up?

Ans - ?

Maybe we can assist each other to find out what the factors are and then how to effectively apply the knowledge to transform our "selves"

You are not a human being.
that's just your story.
one context for understanding

The problem
stated in very general, simple terms
is that:

"People" think that they are
"human beings"! and don't
recognize that "being a H.B"
is a context – a way of looking
at things – an act in the
domain of lang. – and not
a "thing" or perception or etc.
